

VIKAS SINGLA

Cloud Engineer — Multi-Cloud Operations, Infrastructure & Platform Reliability

vikasingla32@gmail.com · +65-92330415 · Singapore · linkedin.com/in/vikas-singla-6691ba8b

PROFESSIONAL SUMMARY

Cloud Engineer with almost 7 years of experience in enterprise cloud infrastructure, multi-cloud operations, and platform reliability engineering in regulated banking environments. Proven track record in designing, deploying, and managing production workloads across AWS, with hands-on expertise in Infrastructure as Code (Terraform, CloudFormation), CI/CD automation and container orchestration (Kubernetes/EKS). Experienced in 24/7 incident response, root cause analysis, SLA-driven troubleshooting, and maintaining high-availability architectures.

CORE COMPETENCIES

Cloud Platforms	AWS (EC2, EKS, Lambda, S3, DynamoDB, CloudFormation, CloudWatch, SNS, Systems Manager, Step Functions) · Multi-cloud architecture principles · GCP fundamentals
Infrastructure as Code	Terraform (modules, state management, multi-env provisioning) · AWS CloudFormation · Automated infrastructure provisioning & drift detection
Containers & Orchestration	Kubernetes · Amazon EKS · Docker · Container lifecycle management · Helm charts · Microservices deployment & scaling
Monitoring & Incident Ops	CloudWatch (metrics, alarms, dashboards) · SNS alerting · Log analysis & troubleshooting · 24/7 on-call operations · SLA-driven incident response · Root cause analysis
DevOps & Automation	Jenkins · Bitbucket · Git · CI/CD pipelines · Python scripting · Shell scripting · Automated deployments · Infrastructure automation · Lambda-based orchestration
Security & Compliance	IAM policies & permission management · Security vulnerability remediation · Regulatory compliance (banking) · Operational standards enforcement · SOPs & runbook authoring

PROFESSIONAL EXPERIENCE

Cloud Engineer — Cloud Operations & Infrastructure

Persol Singapore Pte Ltd (Client: United Overseas Bank) | Mar 2023 – Present | Raffles Place, Singapore

- **Cloud Operations:** Proactively oversee the performance, health, and reliability of cloud infrastructure on AWS, ensuring smooth and uninterrupted operations for mission-critical banking applications.
- **Incident Response & Troubleshooting:** Perform in-depth troubleshooting and log analysis across cloud infrastructure, operating systems, and application layers to identify, diagnose, and resolve system-level issues. Support 24/7 production operations for incident responses.
- **Cloud Architecture & HA Design:** Designed and deployed end-to-end cloud solution architectures integrating AWS services (EKS, EC2, Lambda, S3, DynamoDB, CloudWatch, SNS, Systems Manager) with on-premises servers, ensuring high availability and compliance with banking security controls and regulatory requirements.
- **Infrastructure as Code:** Used Terraform modules for automated deployment, and management, of multi-environment AWS infrastructure. Built CloudFormation templates for consistent, repeatable resource provisioning across SIT, UAT and Prod environments.
- **Kubernetes & Container Operations:** Deployed, managed, and scaled containerised applications on Amazon EKS (Kubernetes), handling container lifecycle management, health checks, and rolling deployments for zero-downtime releases.
- **Automation & Monitoring:** Built automated solutions using AWS Step Functions, Lambda, S3, DynamoDB, and Systems Manager for EC2 instance lifecycle management (creation/termination). Configured comprehensive monitoring and alerting through CloudWatch dashboards, alarms, and SNS notifications.
- **DevOps & CI/CD:** Designed, developed, and maintained end-to-end DevOps CI/CD pipelines using Jenkins, Bitbucket, Docker, and AWS services. Automated build, test, and deployment workflows across multiple environments.

- **Documentation & Knowledge Sharing:** Created operational runbooks, SOPs, and knowledge base articles for service recovery teams. Conducted training and gameday sessions to ensure team readiness for production troubleshooting.
- **Stakeholder Collaboration:** Collaborated with cross-functional teams and stakeholders including business teams, users, and service recovery teams during testing phases, business go-lives, and production incident resolution.

Senior Analyst — Cloud Infrastructure & Automation

Polestar Solutions and Services India Pvt Ltd | Dec 2021 – Mar 2023 | Delhi NCR, India

- **Cloud Solution Architecture:** Designed and implemented end-to-end cloud solution architectures in AWS, translating business requirements into scalable, highly available infrastructure deployments.
- **Stakeholder Collaboration:** Worked with customers and prospective clients to develop integrated cloud solutions, leading detailed architectural dialogues and facilitating delivery of comprehensive multi-service deployments.
- **Automation & Orchestration:** Established and configured API connections through Lambda functions for automated data ingestion into S3. Developed Step Functions to orchestrate AWS Glue jobs in sequential pipelines with CloudWatch-triggered scheduled executions.
- **Training & Mentorship:** Provided technical training to junior engineers and conducted hiring interviews, contributing to team growth and operational knowledge transfer.

Application Development Analyst — Cloud & DevOps Engineering

Accenture Solutions Pvt Ltd | Sep 2019 – Dec 2021 | Delhi NCR, India

- **Cloud Migration:** Developed Python scripts in AWS Glue to migrate data from on-premises SQL/Oracle servers into AWS, building JDBC connections for reliable cross-environment data ingestion into S3.
- **CI/CD & Infrastructure as Code:** Configured and managed CI/CD pipelines across multiple AWS environments using CloudFormation for infrastructure provisioning and Jenkins/Bitbucket for automated deployments.
- **System Administration & Security:** Deployed, managed, and secured EC2 instances across environments, proactively identifying and resolving security vulnerabilities in compliance with enterprise IT policies.
- **Career Progression:** Promoted from Application Development Associate to Analyst in recognition of technical leadership and consistent delivery of high-quality cloud solutions.

EDUCATION

MTech in Enterprise Business Analytics (Part-time, In Progress)

NUS-ISS, National University of Singapore | Expected 2027

B. Tech in Electrical & Electronics Engineering | GPA: 8.22

Maharaja Agrasen Institute of Technology, GGSIPU, India | 2015 – 2019

CERTIFICATION

AWS Solutions Architect — Associate | Amazon Web Services
